## DETAILED ACTION

1. The prosecution is re-opened in view of the Pre-Appeal Brief Request for Review filed on 10/27/2006.

### ***Claim Rejections - 35 USC § 103***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (5,778,747) in view of Meredith et al. (5,957,021), hereinafter Meredith.

Chen teaches a chop saw comprising a base assembly and a saw assembly attached to the base having an upper blade guard 84, a plate 88, a lower blade guard 142, a screw securing the plate 88 to the upper blade guard. See Fig. 1 and 3.

Chen does not teach a first tab. Meredith teaches a first tab 66a for forcing a user to withdraw a fastener a sufficient amount to allow a plate to be pivoted. See Fig. 12 and 13. Therefore, it would have been obvious to one skilled in the art to provide the plate in Meredith a first tab for forcing a user to withdraw the fastener a sufficient amount to allow the plate to be pivoted as taught by Meredith.

Since the small tolerance between the plate and the lower guard, as the screw is moved a second distance, the lower guard contacts the screw upon the rotation of the lower guard.

***Allowable Subject Matter***

4. Claims 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
